Summary

Software Engineer with **1.5+ years** of internship experience building production-grade, full-stack systems serving **700K+ users** at **50K–70K concurrent users** peak. Strong foundation in **Data Structures & Algorithms** (400+ problems solved), **System Design**, and **OOP**. Delivered measurable engineering impact: **87.5% API latency reduction**, **90+ SEO/quality scores**, and a Play Store-deployed EdTech application. Proficient in React, Next.js, Node.js, Redis, AWS, Socket.io/WebSockets, and Micro-frontend Architecture.

Education

Indian Institute of Information Technology, Ranchi 2023 – 2027 (Expected)
Bachelor of Technology in Computer Science and Engineering CGPA: 7.6

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL **Core CS:** DSA, System Design (HLD/LLD), OOP, REST API Design, Agile

Frameworks: React.js, Next.js (SSR/SSG/ISR), Node.js, Express.js, Socket.io, WebSockets, Redux Toolkit, Tailwind CSS, ShadCN UI

Tools & Infra: MongoDB, Redis, AWS (S3, CDN), Docker, CI/CD, GitHub Actions, Unit Testing, Postman, Git, Razorpay, Cloudinary, Firebase

Experience

Software Engineering Intern, Target Board – Hybrid Jan 2026 – June 2026

- Led end-to-end migration to a native App Architecture applying **object-oriented design principles**; successfully **deployed on Google Play Store** serving **700K+ students** with real-time live classes (TP Stream), Socket.io/WebSocket chat, and Firebase push notifications.
- Engineered a production **admin panel with 20+ modules** – RBAC, Test Management, Stream Setup, Payments (Razorpay), Banner Management, and Push Notifications – supporting **50K–70K peak concurrent users**; collaborated cross-functionally through sprint planning and code review.
- Reduced API response times from **800ms to ~100ms (87.5% improvement)** through query optimization, throttling, debouncing, and **Redis-powered caching** for notifications and real-time chat sessions; maintained reliability via **unit testing** and peer code review on every change.
- Currently building a **test and exam module** with complex formula rendering/computational logic and an **offline branch management system** to extend platform capabilities to physical centers.

Full Stack Developer Intern, ExamAdda – Remote June 2025 – Jan 2026
(Part-time, Remote)

- Refactored a monolithic application into **5 independent, object-oriented micro-frontend modules** (Admin Panel, Tech Docs, Current Affairs, DSA Visualizer, Main App) using React, Next.js, Redux Toolkit, and ShadCN UI – improving maintainability and team velocity.
- Improved **SEO scores from 40–50 to 90+** and reduced average page load from **~3.5s to under 200ms** via SSG, ISR, algorithmic caching, and CDN-based rendering strategy changes – competing directly with GFG and W3Schools in search rankings.
- Designed and built a **real-time in-browser code compiler** with queue-based (cron-job) API request management and an animated **DSA algorithm visualizer**; integrated Razorpay-powered exam and test modules on examadda.org.

Projects

Prescripto – Healthcare Ecosystem *MERN Stack, JWT, Razorpay, Cloudinary* GitHub | Live Demo

- Designed and built a **3-role full-stack platform** (Patient, Doctor, Admin) with object-oriented data models for appointment booking, doctor management dashboards, and automated scheduling.
- Implemented secure **JWT-based authentication** and a **PCI-compliant Razorpay payment gateway** integration; optimized a **Cloudinary media pipeline**, reducing profile and record load times by **60%**.

Achievements

- **Problem Solving:** Solved **400+** Data Structures & Algorithms problems across LeetCode, Codeforces, and HackerRank.
- **Microsoft Certified:** Career Essentials in Generative AI (Microsoft & LinkedIn).
- **National Runner-Up:** 2nd Runner-Up, RBI National Level Quiz (2024) – Financial Systems and Logic.
- **Certification:** Alpha Course (Java with Data Structures and Algorithms) by Apna College.
